

Grip Kit as Track Dolly

Grip Kit with seat and adjustable riser

The Grip Kit

GFM's bazooka base kit provides endless possibilities to mount cameras in positions and settings where you can't fit a tripod or use a dolly.

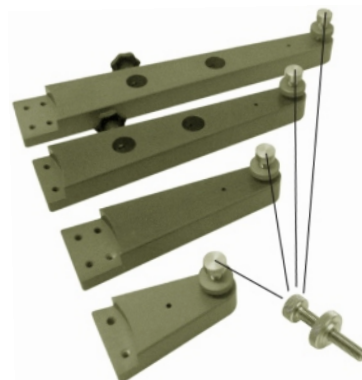

The Grip Kit consists of a mounting plate with Euro-adapter which accepts a selection of up to 5 base legs. The legs are available in 4 standard lengths of 12, 21, 31, 41cm (5", 8", 12", 16"). They can be fitted with padded feet or spikes to adapt to the working surface.

Skateboard wheels are available enabling the Grip Kit to run on standard or narrow gauge track. Special adapter legs allow use of the Grip Kit with either vertical or horizontal scaffold tubing.

All parts are hard coated for added protection and durability.

Centre plate

Legs 12, 21, 31, 41cm

Bazooka Base Centre Plate

- Extension leg (12 cm/ 5")
- Extension leg (21 cm/ 8")
